Nico Yektai

Bench #9

Mahogany 21"H x 120"W x 26"D

The classic dovetail joint takes on a new power as the central organizing principal in this 10' long unique bench. The Joint is connecting the structural elements and transforming them into a decorative explosion of movement that has more in common with geology than with furniture. The rest of the bench flows from that structural moment with broad sweeping movements. The sweep of the under structure pushes up above the surface of the bench and embraces the the 4" thick seat.
