## Outdoor Bench #7

*Sapele and Cast Concrete 18"H x 68"W x 17"D*

Originality takes center stage in this modern concrete bench. The structure is related to the construction I have used in many of my other benches. It is the concrete seat that is breaking new ground in this bench. It adds a significant amount of weight and durability to the bench which make it very well suited to public

spaces. Visually the concrete seat serves as the unifying element that changes the whole meaning of the piece. The facets and step details in the concrete offer me the variation I need to make each one I make truly unique.
