## Pedestal Table #9

*Maple and Glass 30"H x 20"W x 20"D*

This small modern end table serves as a sketch to continue the development of composition with steam bent wood and glass. The scale is perfect to try something adventurous. The glass surface now deviates from a rectangle and the shape becomes an integral part of the design. This pedestal table is a finished piece in its own right but it suggests what I may do in my next large piece involving these same materials.
