Curved Dovetail Console Table

Sapele and Glass 38"H x 70"W x 15"D

Dovetails have developed as a reoccurring theme in my work. I approach them as the ultimate expression of structural decoration. They are once again front and center with in this console table in the wood bridge that connects the leg to the glass table top. The rest of the table relates to this unusual moment with the sweeping power of bent stretchers. The terminates at another leg that has a small tectonic movement of its own that captures the other end of the glass. This table is a breath of fresh air from every possible angle.
